## DETAILED ACTION

### **Terminal Disclaimer**

1. The terminal disclaimer filed on September 27, 2006 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of any patent granted on Application No. 10/564,935 has been reviewed and is accepted. The terminal disclaimer has been recorded.

## **REASONS FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance: This application teaches a composition comprising (a) a major dye component which is a mixture of phthalocyanine dyes of the formula

wherein M is Cu or Ni; Pc represents a phthalocyanine nucleus; R<sup>1</sup>, R<sup>2</sup> and R<sup>3</sup> independently are H or optionally substituted C<sub>1-4</sub> alkyl; R<sup>4</sup> is optionally substituted C<sub>1-4</sub> hydroxyalkyl; x is 0.1 to 3.8; y is 0.1 to 3.8; z is 0.1 to 3.8; the sum of (x+y+z) is 4 and the substituents, represented by x, y and z, are attached to a β-position on the phthalocyanine ring and (b) a liquid medium which comprises water, water and an organic solvent or an organic solvent free from water. The closest prior of record is WO 99/67334 which teaches a similar phthalocyanine dye of the formula as claimed by

applicants having the substituents randomly distributed between the  $\alpha$ - and  $\beta$ -position ring positions but fails to teach or fairly suggest phthalocyanine dyes having 4 substituents only in the  $\beta$ -position as claimed by applicants. Applicants have provided evidence in the specification that the phthalocyanine dye of the instant claims provides improved light fastness and ozone fastness as compared to the phthalocyanine dye of WO 99/67334 (see the tables on page 13 of the specification). Accordingly, applicants showing of unobviousness and unexpected results have overcome the 103(a) rejection over WO 99/67334 and the application is allowable.

Applicants should note that the examiner has cited U.S. Patent Application Publication No's. 20060156951, 20060057309, 20060201384, 20060201385 and 20060162615, however, no rejections have been made over these references since none of them teach or fairly suggest a composition comprising a mixture of phthalocyanine dyes of the formula as claimed by applicants.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
